TECHNICAL SKILLS

- Mobile Development:** Flutter, Dart, Android (Java/Kotlin), iOS (Swift/Xcode), responsive layouts.
- Architecture & Patterns:** MVVM, Clean Architecture, OOP, flavor / white-label engineering.
- Backend & Integration:** RESTful APIs, JSON parsing, asynchronous networking, Firebase (Auth / Firestore / FCM).
- Database & Persistence:** ObjectBox, SQLite, persistent local storage, offline-first architecture.
- Security & Compliance:** token-based authentication, encrypted secure storage, store privacy compliance.
- DevOps & Tooling:** App Store Connect, Google Play Console, Git / GitHub, CI/CD, Postman.

Sambath HUL

Software Engineer | Mobile Developer

Results-driven **Software Engineer** specializing in cross-platform mobile application development with **more than 3 years** of production experience leveraging **Flutter** and **Dart**. Proven track record of architecting scalable enterprise mobile solutions, including multi-vertical super-apps with 80+ screens and multi-tenant white-label platforms. Expertise encompasses MVVM architecture, dynamic UI/UX implementation, RESTful API integration, offline-first local data synchronization (ObjectBox / SQLite), and end-to-end CI/CD deployments via App Store Connect and Google Play Console.

PROFESSIONAL EXPERIENCE

- BookMeBus Co., Ltd.** 2024 – Present
Software Engineer — Phnom Penh, Cambodia
 - Architected and maintained a multi-vertical travel and ticketing **super-application** covering bus, ferry, hotel, airport transfer, and private taxi bookings.
 - Engineered a **white-label, flavor-based architecture** enabling rapid multi-tenant app deployment for key transport operators including iBUS, BS Bus Cambodia, and Oudong Express.
 - Integrated secure payment processing solutions (**ABA PayWay, KHQR**) and high-volume real-time transaction workflows.
 - Optimized network requests, asynchronous state management, and local database caching using **ObjectBox**, reducing app load times and ensuring offline functionality.
 - Managed production build releases and store compliance updates on **App Store Connect** and **Google Play Console**.
 - Implemented **secure authentication and session handling** — token-based login, encrypted local credential storage, and store privacy-compliance flows across all released apps.
 - Authored **technical documentation** for app modules and release procedures, and provided post-release **technical support** to internal teams on user-reported issues.
- Trovara Project** 2023 – Present
Lead Developer & Creator — Phnom Penh, Cambodia
 - Conceptualized, designed, and deployed **Trovara**, an AI-powered offline-first note-taking application incorporating a **Retrieval-Augmented Generation (RAG)** system.
 - Integrated Firebase backend services, user authentication, and **vector indexing** for intelligent text retrieval.

SOFT SKILLS

- **Problem-Solving:** debugging and optimizing app logic efficiently.
- **Collaboration:** working closely with designers and backend developers.
- **Communication:** clear documentation and consistent progress updates.
- **Adaptability:** fast learning of new tools and technologies.

QUALITY & DELIVERY

- **Quality Assurance:** functional and UI testing on production company apps.
- **Release Management:** store compliance, versioning, and staged rollouts.
- **Design Handoff:** inspecting and implementing Figma specs for accurate UI.

PROFESSIONAL EXPERIENCE (CONT.)

○ CamMob Co., Ltd.

Jan 2024 – Apr 2024

Mobile Developer Intern — Phnom Penh, Cambodia

- Developed responsive UI components and state management features for client mobile applications using Flutter.
- Implemented persistent storage mechanisms and optimized data binding processes to ensure seamless offline access.
- Collaborated with senior engineering staff to conduct code reviews, debug RESTful API connections, and refine UI performance across varying device screens.

KEY PUBLISHED APPLICATIONS

- **BookMeBus Super-App** — comprehensive travel and ticketing booking engine (bus, ferry, hotel, airport transfer, private taxi), published on the iOS App Store and Google Play Store.
- **HangMeas App** — media, live-streaming, and event ticketing application built to process high-traffic live audience interactions and national voting systems (X Factor Cambodia).
- **Operator White-Label Apps (iBUS, BS Bus Cambodia, Oudong Express)** — custom-branded transportation management applications running on a unified codebase using a flavor-based architecture.
- **CAO Farm Book** — agricultural farm management application for crop tracking, livestock records, and offline field data logging.

EDUCATION

○ Cambodia Academy of Digital Technology (CADT)

2021 – 2025

Bachelor of Computer Science in Software Engineering — Phnom Penh, Cambodia

- Relevant coursework: Object-Oriented Programming (OOP), Mobile Application Development, Software Architecture, Database Management Systems, Data Structures & Algorithms, and Computer Networks.
- Gained strong foundations in software architecture, mobile app development, and collaborative project work using modern technologies.
